^w^

A tewwibwe owoshpeek comwang inshpiwed bai da Nguh Cuwsed Comwang Coicush :3

(an shubmitted fow da Cuwsed Comwame shoychush 2 ;3)

Oh yeah and there are funni haha speaker notes down there ↓ but also maybe wait cuz theres animations too

Vowels in ^w^:

Ə/ə [ə]

O/o [o]

(Sometimes stylized as ^, such as in the name of the language)

Λ/n [n]

(Yes, Λ is N, yes, N is a vowel, don't question it)

Θ/θ [a]

(Yes, Θ is a, I SAID DON'T QUESTION IT A doesn't look enough like an eye fuck off)

U/u [u]

Consonants in ^w^:

W

[w]

Shock! Horror! Only one consonant!?

Yeah thats right baybee were working with ONE CONSONANT and 5* VOWELS!!!

So, you may ask, how do you make words when all you have is vowels and w?

Well, it's simple: you OwO.

(oh yeah and ^w^ uses VOS word order, didn't know where else to put that so it's going on this slide)

*10 kinda, we'll get to that

^w^ has a STRICT VCV syllable structure.

If a vowel is capitalized, it is stressed. If not, it is unstressed. (If need be, you can mark stress with tone, high/low for s/u)

Because there is only one consonant, lowercase w, and there are 5 vowels with 2 forms each, that means there are 100 words/faces you can make in ^w^. All other words are compounds made of these 100 roots combined using -s and ~s.

As this language was made in only a few hours in between naps on a short road trip, not a single one of these words was a good decision and you will just have to deal with that fact or you'll be going to bed without any supper, young man.

https://docs.google.com/spreadsheets/d/12i8BxW92FG3BP_vihDe3cKpoPcbEoOF_bwFok5Eiwi0/edit#gid=0

^^^ Hey, look, iwi's almost a word in and of itself!

List of all words in ^w^

Punctuation and Lust

Just like vowels, there are five punctuation marks in ^w^, each split into two forms. However, unlike the vowels being split based on stress, the punctuation is split based on sheer **horniness**.

That's right, the lust of the writer affects the punctuation.

Chaste	Horny	Usage	Name
:3	;3	Indicative	Kitten
>:3	>;3	Imperative	Angy
83	93	Conditional	Gwasses
÷3	%3	Interrogative	Nosy
-	~	Compounds words.	

Google Slides literally won't let me reformat this one

I wanted this slides layout to be not this but okay whatever. LOAN WORDS BAYBEE

In ^w^, loan words can be written in their original language's script, with the following rules:

- All "L" and "R" sounds must be replaced with "w" or that language's equivalent ("Tewwibwe")
- Spelling should look like your 3-year-old nephew transcribed it for you. Even better, actually get a 3-year-old to do that. You need to talk with your brother more often anyways, he misses you, you really should hang out with him and his kids!
- Shorten words as much as you can

Writing Compound Words

When writing compound words, start with the word that you want your compound word to share a type with. (Animate noun, nonphysical verb, etc.) If there is more than one that you want to use, choose the one earliest in alphabetical order. Then, you simply follow alphabetical order, top to bottom and left to right! I've already marked it out on the chart. Connect the words with -s or ~s, depending on mood, and you're all set.

Alphabetical order:

O
o
Ə
ə
Λ
n
U
u
Θ
θ

Note: These rules are not entirely strict. If two parts of a longer compound word need to be separated, for example, or you need to make relation clear between syllables, you can rearrange them to whatever order best suits your needs.

Sample sentences

The Sample Sentence goes here.

Here's the translation into ^w^.

Here's a literal translation of what the ^w^ text is saying.

The quick, brown fox jumps over the lazy dog.

owO UwΛ-əwƏ Uwo-OwO-ƟwO
ƏwƏ-UwU Uwo uwo-uwƟ
ƏwƏ-owƏ-ƏwΛ :3

Jump high-place awake-be-not
mammal-cute quick orange-dark
mammal-eats-birds

notices ur bulge What's this?

Owo əwn~UwO~θwƏ ;3 OwO əwə %3

(See round-hard-yours. Is thing?)

Sphinx of black quartz, judge my vow

OwΛ own-owo-ΘwO ƏwƏ-

Think speak-act-mine,
person-animal-hard-black.

I've never understood the appeal of Aghma Shwa. The first video I saw from him had him starting out by trying to gross out the viewer. Obviously, I didn't continue the video. The next one I saw had him starting out by apologizing for 'ruining your day', which I also didn't watch. I just don't get why anyone would watch a guy who makes intros like THAT. Its seriously like he's trying to be as off-putting as possible. He looks more like a troll channel to me than anything else.

OwƏ-OwΛ-ΘwO OwΘ-UwU-Amguh-Schwah ΘwO :3 Own owo-ΛwO owU-OwƏ-UwU-ΘwO ƏwƏ-Owo əwə-Owo-ΛwO-ΘwO :3 owo-ΘwO Owo-nwU UwΘ-owo-ΘwO ΘwO :3

Final Notes

I know I probably have no hope of winning, but as long as I made your day just a little bit worse I'm happy.

Links to this slideshow and the dictionary table will be in the description and/or the pinned comment of the YouTube video

Sadly, because this language was almost entirely made when I was half asleep in the back of a car crossing state lines up to Canada before I even knew the CCC2 was going on, I did not manage to involve rocks in the language. :(

My preferred name is Cye [saɪ], or AthenA [əθíjnə], or my full channel name, I leave it up to you which you'd like to call me. Any pronouns.

OHH I FORGOT THE NUMBERING SYSTEM

^w^ uses a base-10 numbering system.

(No shit, dumbass. EVERY numbering system is base-10.)

^w^ uses *quinary*, base-five.

ΛwΛ = 0

ΛwO = 1

Λwo = 2

ΛwƏ = 3

Λwə = 4

ΛwO-ΛwΛ = 10_5 (5_{10})

ΛwO-ΛwO = 11_5 (6_{10})

Λwə-Λwə-Λwə-ΛwO = 4441_5 (621_{10})

etc.

(also because there are so many logical operators built in as words I think ^w^ might be turing-complete)
